1. System Overview

EUNOIA ERB OS is the internal business operations system for EUNOIA ZONES AGENCY. It replaces fragmented manual workflows with a single integrated platform.

Major Modules

- Employee Management — records, salary profiles, work schedules
- Attendance — fingerprint Excel import, punch processing, exceptions
- Leave Management — leave types, requests, approvals
- Payroll — calculation, approval, locking, payslip generation
- Invoicing — clients, services, invoices, VAT, payment schedules
- Payments — payment recording, installment tracking
- Reports — attendance, payroll, invoice reports
- Administration — settings, schedules, holidays, audit logs

Key Business Rules

- Working days: Sunday–Thursday (configurable)
- Working hours: 10:30–18:30 (configurable)
- Grace period: 15 minutes (configurable)
- Currency: SAR (Saudi Riyal)
- VAT: 15% default, configurable per invoice
- All financial calculations are server-side

2. Getting Started

Login

1. Open your web browser and navigate to the EUNOIA ERB OS URL.
2. Enter your email address and password.
3. Click Login. You will be redirected to the Dashboard.

Navigation

After login, the screen shows:

- Sidebar (left) — navigation menu with all modules
- Header (top) — user info and logout button
- Main Content — the current page

Sidebar Sections

Section	Items
Main	Dashboard, Employees, Attendance, Payroll
Business	Clients, Services, Invoices
Analytics	Reports, Admin

3. User Roles & Permissions

The system has six roles. Each role determines what you can see and do.

Role	Purpose	Key Access
ADMIN	Full system access	Everything
HR	Employee management	Employees, attendance, payroll (calculate)
FINANCE	Financial operations	Invoices, payments, payroll (approve/lock)
MANAGER	Team oversight	View employees, reports
EMPLOYEE	Self-service	Own attendance, payslips
VIEWER	Read-only	Dashboards, reports

Important

Only ADMIN can create new user accounts. Financial operations (invoices, payments, payroll approval) require ADMIN or FINANCE role.

4. Dashboard

The Dashboard is the first screen after login. It shows key business metrics at a glance.

Key Metrics

Metric	Description
Total Employees	Number of employees in the system
Active Employees	Currently employed staff
Today's Attendance	Employees with attendance today
Late Today	Employees who arrived late
Absent Today	Employees marked absent
Pending Exceptions	Awaiting review
Outstanding Invoices	Invoices with pending payments
Overdue Invoices	Past their due date

5. Employee Management

Navigate to: Sidebar ' Employees

Creating an Employee

1. Click Add Employee.
2. Fill in required information:
 - Personal: First/Last name, phone, national ID, gender, address
 - Employment: Employee code, department, job title, join date
 - Fingerprint ID: For matching fingerprint imports
3. Click Save.

Employment Status

Status	Meaning
ACTIVE	Currently employed, included in payroll
ON_LEAVE	Temporarily away
TERMINATED	No longer employed
SUSPENDED	Temporarily suspended

Important

When adding an employee, ensure the salary profile is also created with the correct base salary and components.

6. Salary Profiles

Each employee has a salary profile with base salary and components.

Salary Components

Type	Example	Effect
ALLOWANCE	Housing Allowance	Added to gross
BONUS	Performance Bonus	Added to gross
DEDUCTION	Loan Repayment	Deducted from net
ADVANCE	Salary Advance	Deducted from net

Effective Dating

Salary profiles have effective dates. When a salary is updated:

- The old profile gets an effectiveTo date
- The new profile starts from the effectiveFrom date
- Payroll uses the profile active for the pay period

This preserves complete salary history.

7. Work Schedules

Navigate to: Sidebar ' Admin ' Work Schedules

A work schedule defines working days, start/end times, grace period, and overtime rules.

Default Schedule

- Working Days: Sunday, Monday, Tuesday, Wednesday, Thursday
- Rest Days: Friday, Saturday
- Start Time: 10:30
- End Time: 18:30
- Grace Period: 15 minutes
- Overtime: Enabled (30-min minimum, 180-min max)

Note

Work schedules are fully configurable. The system uses the assigned schedule to calculate attendance — it is not hardcoded to any specific day pattern.

8. Attendance

Attendance Lifecycle

Fingerprint Device ' Excel Export ' Upload to System ' Raw Records ' Employee Matching ' Punch Normalization ' Attendance Day Calculation ' Review Exceptions ' Payroll

Key Concepts

Term	Definition
Punch	A single fingerprint scan (IN or OUT)
Attendance Day	Calculated summary for one employee on one day
Late	Check-in after grace period
Early Departure	Check-out before scheduled end time
Overtime	Work beyond scheduled hours (if enabled)
Exception	Special circumstance requiring review

9. Fingerprint Excel Import

Navigate to: Sidebar ' Attendance

Step-by-Step

1. Obtain the fingerprint export from your device (.xls, .xlsx, or .csv).
2. Go to Attendance ' Import Fingerprint Data.
3. Upload the file (max 10MB).
4. The system auto-detects columns (English and Arabic headers supported).
5. Review results: total rows, valid, invalid, unmatched.

Supported Column Formats

Column	Supported Names
Employee ID	Employee ID, ID, empNo, A8HED' EB1
Punch Time	Punch Time, Time, Date, .J1'*D'
Employee Name	Name, Employee Name, E3'D'

Employee Matching

The system matches records using:

1. Employee Code — exact match to the employee code in the system.
2. Employee Name — fallback matching by first and last name.

Tip

If employees are not matched, verify the employee code in the fingerprint export matches the system. You may need to update the fingerprintId field.

10. Attendance Exceptions

An exception is a recorded deviation from normal attendance that needs review.

Exception Types

Type	Description
LATE_ARRIVAL	Arrived after grace period
EARLY_DEPARTURE	Left before scheduled end
MISSED_FINGERPRINT	Device malfunction
FORGOTTEN_PUNCH	Employee forgot to punch
BUSINESS_TRIP	Approved business trip
WORK_FROM_HOME	Working from home
APPROVED_ABSENCE	Pre-approved absence

Reviewing Exceptions

1. Go to Attendance ' Exceptions.
 2. Review the employee name, date, type, and reason.
 3. Click Approve or Reject.
- Approved exceptions affect attendance and payroll calculations.

11. Leave Management

Leave Types

Type	Default Days	Paid	Affects Payroll
Annual Leave	21	Yes	Yes
Sick Leave	30	Yes	No
Unpaid Leave	0	No	Yes

Leave and Payroll

- Paid leave: Employee receives normal salary
- Unpaid leave: Salary is deducted for leave days
- Sick leave: Typically does not affect payroll

12. Payroll

Navigate to: Sidebar ' Payroll

Payroll Lifecycle

DRAFT ' CALCULATED ' UNDER_REVIEW ' APPROVED ' LOCKED

Status	Description
DRAFT	Period created, not yet calculated
CALCULATED	Payroll calculated for all employees
UNDER_REVIEW	Being reviewed by management
APPROVED	Approved and ready for payment
LOCKED	Finalized, cannot be changed

Calculation Components

Component	Formula
Daily Salary	$\text{Base Salary} \div 30$
Hourly Rate	$\text{Base Salary} \div 30 \div 8$
Overtime	$\text{OT minutes} \div 60 \times \text{Hourly Rate} \times 1.5$
Late Deduction	$\text{Late minutes} \div 60 \times \text{Hourly Rate}$
Absence Deduction	$\text{Absent days} \times \text{Daily Salary}$
Gross	$\text{Base} + \text{Additions} + \text{Overtime}$
Net	$\text{Gross} - \text{Deductions} - \text{Attendance Deductions}$

13. Payroll Approval & Locking

Once locked, payroll records cannot be modified. This protects historical payment data and is required for financial compliance.

Approval Rules

Role	Calculate	Approve	Lock
ADMIN	Yes	Yes	Yes
HR	Yes	No	No
FINANCE	Yes	Yes	Yes
Others	No	No	No

14. Payslips

After payroll is approved, payslips can be generated for each employee.

Payslip Contents

- Company information (name, address, phone)
- Employee details (name, code, job title, department)
- Payroll period (name, date range)
- Earnings breakdown (base salary, overtime, allowances)
- Deductions breakdown (attendance, advances, penalties)
- Net salary
- Attendance summary

Generating a Payslip PDF

1. Go to Payroll ' select the period.
2. Click on an employee to view their payslip.
3. Click Download PDF.

15. Client Management

Navigate to: Sidebar ' Clients

Creating a Client

- 1. Click Add Client.
- 2. Fill in: name, contact person, phone, email, address, payment terms.
- 3. Click Save.

Client Status

Status	Meaning
ACTIVE	Can be invoiced
INACTIVE	Not currently active
BLOCKED	Cannot be invoiced

16. Services

Navigate to: Sidebar ' Services

The services catalog lists all services your company offers. Each service has a name, description, default price, unit, and tax setting.

Creating a Service

1. Click Add Service.
2. Enter name, description, default price, unit.
3. Toggle Tax Enabled if VAT applies.
4. Click Save.

17. Invoicing

Navigate to: Sidebar ' Invoices

Invoice Lifecycle

DRAFT ' SENT ' VIEWED ' PARTIALLY_PAID ' PAID (or OVERDUE ' CANCELLED)

Creating an Invoice

1. Click New Invoice.
2. Select the Client.
3. Add Line Items (select service or enter custom description, quantity, price).
4. Set Discount (optional).
5. Toggle VAT on/off.
6. Set Payment Terms.
7. Click Save (creates as DRAFT).

Invoice Totals

- Subtotal: Sum of all line items
- Discount: Fixed amount deducted
- VAT Amount: $(\text{Subtotal} - \text{Discount}) \times \text{VAT Rate}$
- Total: $\text{Subtotal} - \text{Discount} + \text{VAT Amount}$

18. Payment Schedules & Installments

Payment schedules divide an invoice total into installments with due dates.

Installment Status

Status	Meaning
PENDING	Not yet due
PAID	Fully paid
OVERDUE	Past due date

Recording Payments

1. Open the invoice.
2. Click Record Payment.
3. Enter amount, date, method, reference.
4. Click Save.

Invoice status updates automatically (PARTIALLY_PAID or PAID).

19. Reports

Navigate to: Sidebar ' Reports

Available Reports

Report	Purpose
Attendance Report	Employee attendance summary (present, absent, late, OT)
Payroll Report	Payroll breakdown by period (base, additions, deductions, net)
Invoice Report	Invoice summary (total invoiced, paid, outstanding)
Payment Report	Payment history (amounts, methods, dates)
Revenue Report	Company revenue from invoices

Using Reports

1. Go to Reports.
2. Click the report type.
3. Set date range (From / To).
4. Click Update.
5. View summary and detailed breakdown.

20. Administration

Navigate to: Sidebar ' Admin (ADMIN role only)

Company Settings

- Company name (English and Arabic)
- Contact information (email, phone, address)
- Tax and VAT numbers
- VAT rate (default: 15%)
- Currency (default: SAR)

Work Schedules

- Create and manage work schedules
- Set working days and hours
- Configure grace period and overtime rules

Holidays

- Add official holidays with name and date
- Mark as recurring (annual)

Leave Types

- Configure leave types (annual, sick, unpaid)
- Set default days and payroll impact

Audit Log

- View all system operations
- Track who did what and when
- Review before/after values for changes

21. Troubleshooting

Problem	Likely Cause	Action
Cannot log in	Wrong credentials	Verify email/password with admin
Employee not matched	Code mismatch	Verify employee code matches system
Missing punch	Forgot to punch	Create exception manually
Wrong payroll amount	Attendance deductions	Check attendance records
Wrong invoice total	VAT/discount error	Check settings and invoice details
Database unavailable	Connection lost	Check PostgreSQL, verify DATABASE_URL

22. Quick Reference

HR Workflow

Employee ' Schedule ' Fingerprint Import ' Attendance ' Exceptions ' Leave ' Payroll

Finance Workflow

Client ' Service ' Invoice ' Payment Schedule ' Payment ' Reports

Management Workflow

Dashboard ' Reports ' Approvals ' Audit Review

Monthly Payroll Checklist

- Verify all employees are ACTIVE
- Verify salary profiles are current
- Import fingerprint data for the month
- Process attendance
- Review and resolve all exceptions
- Create payroll period
- Calculate payroll
- Review breakdown
- Approve period
- Generate payslips
- Lock period

23. Security & Data Handling

Access Control

- Role-based access controls all operations
- Financial operations require ADMIN or FINANCE role
- Employee management requires ADMIN, HR, or MANAGER role
- All API routes verify authentication

Sensitive Data

- Employee salaries are confidential
- Financial records are confidential
- Client information is confidential
- Never share credentials

Data Protection Rules

- Never commit real business data to public repositories
- Preserve raw fingerprint exports
- Do not bypass approval workflows
- Do not modify locked payroll records
- Keep environment credentials (.env) secret

Audit Logging

- Every important operation is logged
- Logs include who, what, when, and before/after values
- Review audit logs regularly for security
